DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 12-31 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for increasing pressure within the pressure chamber 934) in paragraphs 35-39, does not reasonably provide enablement for how one would adjust the pressure. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the invention commensurate in scope with these claims. Specifically, attention should be addressed to line 25 of claim 12. The Examiner believes that the "means for adjusting the injection pressure in the pressure chamber" in this case may be the valve (38), however the Specification gives little information on how the pressure in the pressure chamber is actually adjustable, which leads the Examiner to assume the pressure chamber to be either manually adjusted or adjusted by an undocumented actuation of the valve (38).
